

PART 2

1. Briefly describe your overall impressions of the Summer Immersion program. (What specific activities/events of the Institute had the most impact on you? What was the most valuable experience (s)? What challenges or concerns were presented?)

Comments:

Well this program convinced me that I must get my Ph.D and showed me that as an African American male it is best that I stay in STEM field, Well all of these labs were great I wish yall would explain them more because I am lost sometimes. Major concern, we stayed on campus, with no meal plan, no Howard ID's which is needed for everything here, and

2. In what ways (if any) do you think the Summer Immersion program could have been
