

PART 2

1. Briefly describe your overall impressions of the Summer Immersion program. (What specific activities/events of the Institute had the most impact on you? What was the most valuable experience (s)? What challenges or concerns were presented?)

Comments:

The labs had the most impact on me because it enabled me to refresh on prior knowledge and understand the knowledge better. The most valuable experience was the hands on experience with the tools and equipment in the lab which will help me in the future when asked to use it again.
