

PART 2

1. Briefly describe your overall impressions of the Summer Immersion program. (What specific activities/events of the Institute had the most impact on you? What was the most valuable experience (s)? What challenges or concerns were presented?)

Comments:

I enjoyed participating in the labs. They were very hands on and I learned new skills that will help me later on. However, the presentations given by Dr. Ullah were difficult to understand due to his heavy accent. The other presenters were good.
