

PART 2

1. Briefly describe your overall impressions of the Summer Immersion program. (What specific activities/events of the Institute had the most impact on you? What was the most valuable experience (s)? What challenges or concerns were presented?)

Comments:

I had a great time here. I learned about so much new stuff I never knew about. Dr. Wilan is a great teacher & loved isolating DNA and running them on cells. Another part I loved was when Dr. Chang came she was very interesting to listen to
