

PART 2

1. Briefly describe your overall impressions of the Summer Immersion program. (What specific activities/events of the Institute had the most impact on you? What was the most valuable experience (s)? What challenges or concerns were presented?)

Comments:

It wasn't what I expected. We didn't go on field trips like it was ~~stated~~ stated in the email. Plant biotechnology wasn't one of my interests coming into the program and it still isn't an interest after it.
